

Who's Your Daddy? Part 4
Genesis 1:9-13
 November 17, 2002

Intelligent Design states that the evidence seen in creation supports the theory of an intelligent creator and directly opposes the evolutionary view of random chaos.

Evidence of Intelligent Design – A combination of a recognizable pattern and illogical association.

Earth Anthropic Principles – Principles that uniquely prepare the Earth to sustain life.

Genesis – Book of Beginnings.

Day one - Water, light, darkness. Day and Night, evening and morning.
 Gen 1:2-5

Day two - Firmament - heavens – Gen 1:6-8

Day three - Dry land is called earth, gathering of waters - seas. Seed bearing grass, herbs and fruit trees are grouped in 'kinds' and able to reproduce. Gen 1: 9-12, Job 38:1-30.

God separated the water from the land.

Ps 95:3-5 *For the LORD is the great God, And the great King above all gods. In His hand are the deep places of the earth; the heights of the hills are His also. The sea is His, for He made it; And His hands formed the dry land.*

Earth facts: The surface of the Earth is 196,940,400 square miles

- 57,280,000 square miles of land
- 139,660,400 square miles of water
- 71% of the earth is covered with water

Key Relationships

1. Moon and clean water
2. Sun distance, temp and carbon molecule strength
3. Earth's surface and gravity
4. Seasonal variations, Earth tilt and disease

Water is intelligently designed and irreducibly complex.

1. Makes up 80% of all living things
2. People cannot live more than a week without it
3. Solid form is lighter than liquid form
4. Freezes from the top down.
5. Regulates the world's climate
6. Liquid water is found nowhere in the universe
7. Percentage of water on the planet is similar to the percentage of water in the human body

Water cycle is designed. Ocean, evaporation, clouds, winds, rain and snow. Isa 55:8-11

Soil you can eat:

1. _____
2. _____
3. _____

Plants are intelligently designed - Ps 104:14 *He causes the grass to grow for the cattle, and vegetation for the service of man, that he may bring forth food from the earth...*

Photosynthesis

- Plants need CO₂; animals exhale CO₂
- Plants give off O₂; animals need O₂
- Plants need N₂; animals excrete N₂ in the form of waste

Water travels up through plants _____

Seeds and "kinds" _____

Vegetables: _____

Fruits: _____

Herbs: _____

Thorns: _____

- Make plants difficult to handle.
- Symbol of sin and the curse Gen 3:18
- Compared to fools 2 Sam 23:6-7
- Good for the fuel thus burned. Eccl 7:6
